Support: Affirm and encourage our members and volunteers to achieve their personal goals.

Invite: Share opportunities to get involved and give back to the community.

THE RESULT

When people experience the Y, they know – and feel – that they belong to a charitable cause that transforms lives.

PROTECTING OUR KIDS

Each day, parents look to the YMCA to provide a safe and secure environment where children can learn practical social skills and develop positive values. Our reputation for consistency and safety, as well as our focus on youth development, gives parents the confidence they need to trust us with their children.

I know that I am not to be alone with children at the Y or outside of Y programming for youth I have met through the Y.

I understand that as a volunteer for the Y I am serving as a role model and I agree to abide by the statements above.

GREATER JOLIET AREA YMCA UNDERSTANDING SAFETY STANDARDS

At the Y, we are committed to maintaining a safe work environment and ensuring the health and well-being of our employees and volunteers. The information below is designed to provide you with an overview of Bloodborne Pathogens.

UNDERSTANDING BLOODBORNE PATHOGENS

Bloodborne Pathogens are infectious microorganisms that are found in human blood and other potentially infectious materials (OPIM), such as bodily fluids, that can cause disease. These pathogens include, but are not limited to, Hepatitis B, Hepatitis C and HIV.

MODES OF TRANSMISSION

Bloodborne Pathogens are most commonly transmitted through:

- Accidental puncture from contaminated needles, broken glass or other sharp objects
- Contact between broken or damaged skin (cuts, abrasions, bites) and infected bodily fluids
- Contact between mucus membranes and infected bodily fluid

UNDERSTANDING HOW TO AVOID EXPOSURE TO BLOODBORNE PATHOGENS

- **AVOID** contact with blood or other potentially infected materials (OPIM)
- **ALWAYS USE UNIVERSAL PRECAUTIONS** and treat all human blood and bodily fluid as if it was known to be infected with Bloodborne Pathogens
- **ALWAYS USE PERSONAL PROTECTIVE EQUIPMENT**, such as gloves, gowns, eye protection and masks, which are available for your use
- **WASH YOUR HANDS** after providing first aid care or cleaning, using warm water and soap. Be sure to rub your hands vigorously for at least 15 seconds covering all surfaces of your hands and fingers, and then rinse with warm, running water. Handwashing is the most effective way to avoid the spread of infection.

WHAT TO DO IF YOU ARE EXPOSED TO INFECTIOUS MATERIAL

If at any time you are exposed to blood or other bodily fluids, please notify your volunteer supervisor and ask to complete an incident report. Your supervisor will work with you to complete any additional documentation and provide post-exposure follow-up instructions.

I understand that as a Y volunteer, it is my responsibility to always use universal precautions and personal protective equipment when dealing with possible Bloodborne Pathogen exposure

At the Y, we are committed to providing a safe and enriching experience for all children in our care. As a volunteer, you are a vital component of our Child Abuse Prevention Program. By working together, we can ensure that children in YMCA programs are safe and receive the support they need to learn, grow and thrive. The Greater Joliet Area YMCA has “zero tolerance” for abuse.

DEFINING THE TYPES OF ABUSE

Neglect: Failing to maintain a child’s health, safety and well-being

- Talk with the children in your care to identify trusted adults in their lives
- Never be alone with children you have met at the Y or through YMCA programming

IDENTIFY PREDATORY BEHAVIOR AND ALWAYS REPORT YOUR CONCERNS
